Installation

Installing the fonts is easy, but the exact way depends on the operating system:

Windows XP and older: Unzip the downloaded fonts. Start the Windows Control Panel, select the "Fonts" icon, then run the "File/Install new font" menu command.

Windows Vista and Windows 7: Unzip the downloaded fonts. Open an Explorer window to this folder. Now right-click on the desired font and select "Install" from the popup menu.

Apple Mac: Unzip the downloaded fonts. Double-click on the font that you want to install. A window with a font preview appears now. Click the "Install" button there to install the font.

Even more fonts...

The 80 fonts in this download are just a small selection of the full typeface library offered by SoftMaker. In SoftMaker's font packages, you find a wide variety of fonts: classic text fonts, elegant script typefaces, eye-catching headline and decorative fonts, and beautiful handwriting type.
